

Project Charter

Field	Details
Title	Smart Bharat – An AI-Powered Rural Assistant (Progressive Web App)
Start Date	01 Jan 2026
End Date	30 Mar 2026
Project Manager	Shreyash Mehta
Team Members	Shreyash Mehta, Yash Shinde, Rupesh Patil, Aditya Nikam
Overview	Smart Bharat is an AI-powered Progressive Web App designed for rural India. It provides real-time weather alerts, health and emergency information, and government scheme guidance in multiple Indian languages. It supports voice and chat-based interaction for easier access.
Problem Statement	Many rural regions face challenges in getting timely information due to limited digital access and language barriers. Smart Bharat helps by delivering trusted information in local languages through AI and cloud-based APIs.
Scope	Voice-enabled AI assistant, multilingual translation, live weather updates and alerts, health and emergency news updates, user settings for language and voice, mobile-friendly PWA design
Out of Scope	Payment system, government authentication, offline AI without internet
Technology Stack	Frontend: Next.js (React), TypeScript, Tailwind CSS. AI: Google Gemini API. Translation: Google Translate API. Platform: Progressive Web App
APIs Used	Google Gemini API, Google Translate API, WeatherAPI, NewsAPI
Budget and Resources	Low budget using free tools and free-tier APIs. Laptop/PC, internet connection, API keys, and deployment platform (Vercel/Firebase) are required
Stakeholders	Rural citizens, farmers, students, healthcare workers, teachers, government or panchayat officials, NGOs, general visitors
Success Criteria	Works smoothly on mobile devices, real-time data updates, multilingual AI responses, easy interface and settings, stable and demo-ready deployment
Methodology	Agile iterative development: planning, design, development, integration, testing, deployment
Approvals	Faculty guide approval, team approval, final submission approval
